The most exasperating, important, difficult, thankless, yet fulfilling assignment in life is parenting. *Coaching Kids* is a guide to creating and maintaining harmonious communication with children when they are very small and lasting throughout their adult years when they are parents themselves.

Excellent parenting is not a substitute, but merely a launching pad for children to develop their own true identity. The authors present to young parents, single parents, grandparents, teachers, and caregivers the importance of understanding who kids are and are not—for everyone's good. With this understanding in mind, the book guides readers toward diplomatic dialogue and how to blend effectively several different personalities in a family setting.
