In the modern world we are becoming bombarded by craft. Hand-made tools, artisan breads and craft beers are all part of a pantheon of goods designed to appeal to our earthier selves, our sense of tradition, quality and luxury, all brought together through a personal touch - objects to savour in a world of meaningless mass manufacture.

But once, craft - or more specifically, *cræft* - meant something very different. When it was first written down in Old English, over a thousand years ago, it had an almost indefinable sense of 'knowledge', 'wisdom' and 'power'. To be *cræfty* was to be truly intelligent - but in a way that is almost inconceivable to us today.

Through a series of mini-histories, detailed craft analyses and personal anecdotes, archaeologist, historian and broadcaster Alex Langlands goes in search of the lost knowledge of *cræft*.

Fusing stories of landscapes, personalities and mesmerising skill, with back-breaking hard work, this book will convince readers - for their health, wealth and well-being - to introduce more *cræft* into their lives.
