A New York Times Notable Book of 2018

'Majestic, informative and often delightful ... insights on every page' Yanis Varoufakis, *Observer*

The definitive history of the Great Financial Crisis, from the acclaimed author of *The Deluge* and *The Wages of Destruction*.

In September 2008 the Great Financial Crisis, triggered by the collapse of Lehman brothers, shook the world. A decade later its spectre still haunts us. As the appalling scope and scale of the crash was revealed, the financial institutions that had symbolised the West's triumph since the end of the Cold War, seemed - through greed, malice and incompetence - to be about to bring the entire system to its knees.

Crashed is a brilliantly original and assured analysis of what happened and how we were rescued from something even worse - but at a price which continues to undermine democracy across Europe and the United States. Gnawing

away at our institutions are the many billions of dollars which were conjured up to prevent complete collapse. Over and over again, the end of the crisis has been announced, but it continues to hound us - whether in Greece or Ukraine, whether through Brexit or Trump. Adam Tooze follows the trail like no previous writer and has written a book compelling as history, as economic analysis and as political horror story.
