Kill Everyone took the poker world by storm when it was first released in 2007. Its perfect blend of real-time experience, poker math, and computational horsepower created new concepts and advanced strategies never before seen in print for multi-table tournaments, Sit-n-Go's, and satellites.

In this revised and expanded second edition, *Kill Everyone* adds even more ammunition to a tournament-poker-player's arsenal. In addition to groundbreaking analysis of fear-and-fold equity and equilibrium, plus the presentation of optimal strategies for the bubble, the end-game, and heads-up play, this second edition adds 50 pages of incisive commentary from the hottest tournament-poker player in the world, Bertrand "ElkY" Gropellier, and a new chapter on short-stack cash games to go with the original discussion of playing in short-handed cash games.

With a Foreword by 2006 World Series of Poker champion Joe Hachem, annotations by ElkY, and solid math-based strategies from Lee Nelson, Tysen Streib, Steven Heston, and Mark Vos, *Kill Everyone* packs more poker brainpower between two

covers than any book to come before it.
