This unique book is for two audiences! Read one way it is for educators; flip it over and read the other way it is for project managers! Project based learning (PBL), a set of engaging and powerful learning methods organized around motivating projects, is one of the most popular ways to bring the skills used by project management into students' educational experience, giving them amazing opportunities to develop the essential 21st century competencies they need. In Project Management for Education: The Bridge to 21st Century Learning, authors Bernie Trilling and Walter Ginevri provide a "two-in-one" guide for educators and project management professionals, demonstrating how the two fields can work together. By teaming up to enrich the experience of students, both educators and project management professionals can continue to develop their own skills and better meet the challenges they face in our ever-changing world.
