Time-saving chapter summaries
Analysis and Commentary
A guide to additional resources, including helpful articles, books, podcasts, and videos

About Sapiens by Yuval Harari

Did you know that, a hundred thousand years ago, there were at least six separate species of human beings on Earth? Today, there is only one—homo sapiens. Sapiens by Yuval Harari provides an expansive look at the modern world's view of the ways human beings have evolved and the catalysts behind the species and cultures we've become, all the way from the beginning of mankind to the present day and beyond. Harari combines history and science to provide a unique perspective to the traditional narratives of human development and examines what happened to the other five species of humans and what may ultimately happen to us.

Please note that this summary is NOT the original book and is meant to be read as a supplement to the original.

About SpeedReader Summaries

Thanks so much for your interest in SpeedReader Summaries! We strive to save what is your most precious and limited resource--time.

Do you ever feel like you just want your favorite non-fiction books to get to the point? Are you tired of wasting time weeding through fluff and anecdotes to get to the meat of the material?

SpeedReader Summaries carefully distill and analyze the key points of your favorite books and provide additional commentary and resources to supplement your understanding of the material. Inside every SpeedReader summary, you'll find a thirty-second overall summary of the book, brief summaries of the key points of each chapter, a custom analysis, and additional resources like discussion questions, relevant articles, other books, and even quizzes.

At SpeedReader Summaries, bringing you maximum benefit in minimum time is our main

objective!
