À la fin des années 2060, la présidente française de Transparence, une société du numérique implantée en terre sauvage d'Islande, est accusée par la police locale d'avoir orchestré son propre assassinat. Or au même moment, son entreprise s'apprête à commercialiser le programme Endless, un projet révolutionnaire sur l'immortalité, qui consiste à transplanter l'âme humaine dans une enveloppe corporelle artificielle. Alors que la planète est gravement menacée par le réchauffement climatique, cette petite start-up qui est sur le point de prendre le contrôle du secteur numérique pourra-t-elle sauver l'humanité ? Ce roman d'anticipation éblouissant nous dévoile le monde de demain pour mieux nous révéler celui d'aujourd'hui et mettre en lumière la plus grande révolution technologique de notre histoire.
