As a student of Vedic astrology, one of the challenges that I faced was to study classical texts. We have so many texts and every text has some exceptional content. Most of the translators did not get a chance to validate principles mentioned in the texts and due to this; the accuracy of translation was reduced. Due to all the reasons mentioned above, I started noting my own observations while studying various classical texts. Over the period, I also felt that novice students of astrology could progress faster if they get validated knowledge. This is also good for the development of Vedic astrology. Therefore, I decided to publish my notes from various classical texts as a manual. This is a good reference book for novice student of Vedic astrology.
